Thematic Background – The Academic world as a whole assimilates a wide range of intangible assets combinedly termed as the “Intellectual Property”. This particular property necessarily is a product of human intellect and the rights granted on it allow its owner to create a monopoly over it and to benefit from its correct usage. Such benefit often requires recognition by a statute, what we commonly refer to as “Intellectual Property Rights” or simply IPR. IPR plays a key role in academic sector and thus an adequate legal framework for its protection is very much required. The National webinar on “**Key Insights on IPR: An interface and emerging issues**” offers an effective platform for sharing expertise and ideas regarding the recognition and safeguard of IPR in special context to our university education system.
